## Experience

---

### Web Developer

September 2023 — April 2025

*Hi-Technic Systems and Services - Mumbai, Ghatkopar*

- **Hands-on work with Industry Experts :** Gained in-depth knowledge and practical experience of intensive web development.
- **My Role :** Worked on a petsCare staff project using the MERN stack under my seniors and client requirements. Basically, my responsibility to developed entire backend ecosystem from sratch and also to do little bit of frontend using Typescript.

### Full Stack Developer - Training

February 2023 — June 2023

*RST Forum - Mumbai, Dadar*

- **Application Development :** Designed and maintained interactive full fledge ecommerce web application using mern stack.
- **Team Collaboration :** Work with frontend developers to create dynamic UI components, optimize application performance, and ensure ecommerce seamless functionality.

## Projects

---

### Quickify - Ecommerce Platform | *Mern Stack*

- **E-Commerce Platform :** Developed a full-featured e-commerce web application with user authentication, product management, and order processing using PayPal.
- **Admin Dashboard :** Built an admin panel for product management, including add, update, and delete operations. Implemented secure payment gateway functionality for seamless order placement using PayPal developer sandbox credentials. Built an admin panel for product management, including add, update, and delete operations.

## **petsCare - Pet Care Management** | *Mern Stack - Typescript for frontend*

- **Platform** : A pet care management platform where pet owners can directly book appointments with veterinarians, track pet health, and manage vaccination records.
- **Admin Role** : Admin can manage doctors, services, and pet records. Admin has access to track appointment histories, manage service categories, and ensure smooth coordination between pet owners and service providers.

## **eCheckup - Hospital Management** | *Advance Java - JSP, Servlets, SQL, JDBC, Javascript, JQuery*

- **Overview** : We can make appointment with doctors. Admin can also provide various services to all users. Doctors can also update their profile if they want.
- **Users Role** : Users can also share their doubts with doctors separately by sending direct messages without appointment as well.

## **Conversify - Real Time Chat** | *Mern Stack, Socket IO*

- **Featured** : In this app, user can chat with another user like a real time .
- **Functionalities** : Individual user can see each other profile and after that they can chat with each others.

## **Certifications**
